

Make KEEN TECHNICAL SOLUTIONS part of your Re-Opening Strategy

Now more than ever, KEEN has the strategies for Cleaner, Safer and Healthier Air for inside commercial and residential buildings.

KEEN provides proven technologies that produce neither ozone nor other harmful by-products. All of our "Needlepoint Bipolar Ionization" (NPBI) products are UL & CE approved and proven to kill COVID-19 in and on surfaces.

Our NPBI products purify the air by eliminating airborne particulates, odors and pathogens. The patented technology uses an electronic charge to create a plasma field filled with a high concentration of + and - ions that travel with the air stream to attach to particles, pathogens and gases and kills the airborne pathogens by robbing them of hydrogen in both occupied and unoccupied areas.

Particle Reduction

NPBI technology reduces airborne particles (i.e., dust, pet dander, pollen) through agglomeration. The ions attach to the airborne particles. The particles are subsequently attracted to one another, effectively increasing their mass and size. The air filtration system easily captures the larger particles, increasing the capture efficiency of your HVAC system.

Pathogen Reduction

During the cleaning process the NPBI technology attacks and kills viruses, mold spores and bacteria. The ions steal away hydrogen from the pathogens, leaving them to die, and leaving you with clean and healthy indoor air.

Odor Reduction

During the cleaning process chemical, pet, cooking, and other odors are broken down into basic harmless compounds, leaving the indoor air fresh smelling and free of odor causing VOCs.

Energy Saving

NPBI's environmentally friendly cleaning process allows commercial buildings to significantly reduce the amount of outdoor air required to operate. This equates to a safer, more comfortable environment that requires up to 30% less energy to condition.

KEEN believes that by promoting your investment in providing your employees and customers with hospital quality indoor air supplies puts you at a significant advantage in today's challenging market. Let KEEN provide you with a no cost audit and estimate to see what your building needs to provide you piece of mind and increased healthy atmosphere for you, your employees and valued customers!

Breathe Safely with Keen.
