

LAKE GEORGE
E-MARINE EVENT

Michigan E-Marine Event

superPowered by

24th August 2023 - 2-5pm

Elk Rapids Marina, 118 Bridge St, Elk Rapids, MI 49629

Please join us to learn about Michigan's growing marine charging corridor and experience the advantages of silent, zero emission electric boating.

In April 2023, Gov. Gretchen Whitmer announced the Fresh Coast Maritime Challenge (FCMC), a dedicated grant program to help companies decarbonize and electrify Michigan marinas and watercraft. This first-in-the-U.S. challenge program put Michigan at the forefront of sustainable maritime transportation, including recreational boating, marina innovation, and Great Lakes commercial activity.

Elk Rapids Marina is proud to showcase the complete electric marine ecosystem, together with **Aqua superPower**, the first company to design and develop a dedicated electric boat fast charging network with technology, functionality and features tailored specifically for this sector. Leading electric boat builders **Ingenity**, **Vita Yachts**, and **X Shore**, and **Flux Marine** with their revolutionary electric outboard motor, will demonstrate how zero emissions and zero noise still mean all the performance - whether recreational, sports, or work boat.

- Test Rides of various electric vessels
- Rapid charge network demonstration
- Discussion on sustainable electric boating
- Sundowner and networking
